Office Action Summary	Application No. 09/898,899	Applicant(s) HOFFMAN ET AL.	
	Examiner Frantzy Poinvil	Art Unit 3628	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a method for conducting a dynamic auction in a virtual environment, classified in class 705, subclass 35.
 - II. Claims 10-14, drawn to a method for converting an online static auction having a pre-established expiration time limit into an online dynamic auction , classified in class 705, subclass 35.
 - III. Claim 15, drawn to a computer program stored in a physical medium for use in a server computer related to an auction system, classified in class 705, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case the different inventions are unrelated because as can be seen above each of the invention intends to accomplish a different result using different means, steps or functions.

Invention I, claims 1-9 does not require functions for converting an online static auction having a pre-established expiration time limit into an online dynamic auction, as required in Group II or an ADM component, an RDA component and an UIM server-side component as required in Group III.

Invention II, claims 10-14 does not require identifying providing electronic data to a first

group comprising information relating to received bid information concerning a first auction as required in Invention I or an AMD component, an RDA component and an UIM component as required in Invention III.

Invention III, claim 15 does not require converting a static auction to a dynamic auction as required in Invention II or providing electronic data to a first group comprising information relating to received bid information concerning a first auction as required in Invention, as required in Invention I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and have also acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frantzy Poinvil whose telephone number is (571) 272-6797. The examiner can normally be reached on Monday-Thursday.
